In each part (part 1 and part 2) you find the map printed twice on the sheet; controls are placed on both sections (for instance in part 2 you find controls 20 21 24 on one section and 22 23 25 on the other section). This is to avoid controls circles to collide. See example below.

Finish symbol is not placed correctly – there's a purple line on the map with its approximate location.
