PALMANOVA

COMUNE
DI PALMANOVA

It is an honour for the town of Palmanova to host the races of the Italian MTBO Sprint Championship - WRE. The walls of Palmanova, a UNESCO World Heritage Site since 2017, are a unique setting for sporting competitions. The nature and history surrounding the star-shaped fortress of Palmanova are an evocative place to experience by bike as well as on foot, by running or horseback riding. It is an unspoilt space where you can walk and live in the open air. The vast green meadows, over 1.5 million square metres wide, and the three circles of Venetian and Napoleonic walls with their centuries of history, will be the setting of such a great sporting event.

In recent years, the Municipal Administration of Palmanova has been very committed to enhancing its most precious asset, by clearing the Bastions of the vegetation, making large fortified areas suitable for visiting, creating a tourist offer and promoting the city as a national and international tourist destination.

The star-shaped town hosts competitive and amateur competitions throughout the year, including running events, mountain biking and equestrian competitions. All these disciplines enhance the combination of the scenography of our World Heritage Site ramparts and the sporting expression.

We would like to thank the FVG Regional Committee of the Italian Orienteering Federation for choosing Palmanova. We will be delighted to welcome the athletes to the town, admiring their top sporting performances.

Giuseppe Tellini
Mayor of Palmanova

Thomas Trino
*Board Councilor
for Sport of Palmanova*

RAGOGNA

COMUNE
DI RAGOGNA

It is a real pleasure to extend my own greetings and those of the entire Ragogna Municipal Administration and of the citizens that I have the honour to represent to the FISO FVG Regional Committee and to all the participants in the sports event. We particularly appreciate your choice to organise such an important race in our municipal territory.

I hope this event will allow you to discover and appreciate the various beautiful things that our municipality can offer.

Ragogna, according to all the visitors we have hosted at different times and moments, represents almost a small compendium of the universe. In a territory that is only 22 square kilometres wide you can find the Tagliamento River, called the king of Alpine rivers, the Ragogna Mountain, which is the highest hill in Italy, the Ragogna Lake, that is an important example of a morainic lake, the hills and the plain. This important environmental and landscape reality makes our municipality the “Land of a Hundred Horizons”, because in each of its corners the panorama changes, the horizon and the perspective change. In addition to this aspect, another important reality, linked to our history and historical sites, characterises our area. In fact, some evidence of agricultural settlements dating back to the “Ancient Neolithic / Recent Mesolithic” periods has been found near the lake, a clear indicator that this area has been a privileged habitat since ancient times. Besides, in the hamlet of San Pietro, there is the Ragogna Castle, whose oldest nucleus dates back to the Romanesque period and was mentioned by Venanzio Fortunato (6th century A.D.) and Paolo Diacono (8th century A.D.).

In more recent times the “Battle of Mount Ragogna” took place between the end of October and the beginning of November 1917, after the defeat of Caporetto. This little-known wartime episode, the Battle of Ragogna, allowed the Italian army to deploy on the River Piave, avoiding defeat and

limiting losses. To commemorate this event and the living conditions of the soldiers during the First World War in this area, our municipality has created, with the contribution of the European Community, what is now an important and well-known Great War Museum. It is divided into two parts. The first one is located outdoors, in various areas of the municipal territory, and particularly on our mountain, where the remains of the Great War are visible (trenches, gun emplacements, barracks, etc.). The second part is housed in the Museum building, located in the administrative centre, which consists of a number of rooms containing, among other things, an interesting model reproducing the scenario of the battle of Mount Ragogna. It contains also various exhibits, as well as a modern didactic itinerary, which is aimed at making people understand the events of the First World War on the Tagliamento front.

In short, genuine excellences, still unknown to many, that enrich our territory. Ragogna offers very special, truly unique historical, cultural and naturalistic moments to visitors.

I renew our warm welcome to all of you and wish you a pleasant stay in this 'oasis' of nature, history and fragrant flavours.

A presto rivederci. / See you soon.

Alma Concil
