

BULLETIN 2

Coppa Italia Trail-Orienteering, 2.a manche - CHIS Cup Campionato Veneto Trail-Orienteering – memorial “Antonio Lunardon” Sunday, March 10, 2024, Grantorto (PD), Italy

We must warn all participants that the latest two weeks many rivers in northern Italy are far above their average level. In particular, we are monitoring the Brenta river since last week. Unfortunately the situation is not easy: the hydrometric level has been constantly more than 150 cm above the average level, and for this reason a significant part of the track where the competition was supposed to take place is still under water.

We are trying to understand whether we can still hold the competition, possibly modifying tracks and/or race type (for example, by proposing One Man Relay or Temp-O): today (Wednesday, 6) we will do the final survey over the race terrain, and as a consequence we will understand if and how the competition can be organized, or if we will be forced to cancel it.

We will publish an update, possibly together with the starting lists, by Wednesday 6 night.
